PERSONAL SUMMARY

I am a friendly, hardworking and motivated student proficient in **Java**, **Python**, **HTML**, **CSS** and **Javascript**, **C** and **C++**. I enjoy interacting with and helping people, and am quick to learn new skills. I am constantly looking to learn new things and further my knowledge.

EXPERIENCE

Mastercard — *Software Engineering Intern*
Leopardstown, Dublin

February - July 2026

During my 6 month internship at Mastercard, I worked both on-site and remotely as part of a large-scale migration project. I developed technical and collaborative skills through exposure to AI MCP technologies and cross-functional teamwork, and also contributed to the Intern Charity Committee by organising volunteering days, social events, and engagement activities for my fellow interns.

Light House Cinema — *Front of House Staff*
Smithfield, Dublin 07

September 2025 - March 2026

As a Front of House Staff, similar to my role as a cinema host in Odeon Cinemas, sharp problem solving skills were required in order to deal with the day-to-day of cinema operations.

Odeon Cinemas — *Cinema Host*
Blanchardstown, Dublin 15

March 2024 - August 2025

As a Cinema Host, I developed strong problem-solving skills, attention to detail, and customer service abilities while managing ticket sales, concessions, and theater operations. Handling point-of-sale systems and troubleshooting technical issues enhanced my ability to work with digital systems efficiently. Coordinating with team members in a fast-paced environment improved my communication and teamwork skills, while adhering to safety protocols and optimizing workflow demonstrated my analytical thinking. These experiences have strengthened my adaptability and technical proficiency.

EDUCATION

Maynooth University
Maynooth, Co. Kildare

I have received a first (1.1) in my **First, Second** and **Third** year of college.

SKILLS/ACHIEVEMENTS

Communication & Teamwork
Worked in jobs that require teamwork and communication to be as proficient as possible.

Problem Solving
From studying Computer Science, I have developed excellent problem solving skills allowing me to deconstruct and efficiently solve problems.

I tutored in the Maynooth Computer Science Support Centre (CSC) in both First and Second Year.

PROJECTS

Microsoft Internship Project - AI News Aggregator

I was one of the few Maynooth Students to be chosen to develop an AI News Aggregator website using Microsoft's newest AI model. I primarily worked on the React Frontend but kept a keen interest in all aspects of the project's development. Received a grade of 100%. Link to the project's Github.

Online Portfolio for Dublin-Based Photographer - HTML/CSS/JS

My current project is the development of nichoimin.ie, a portfolio for the Dublin Photographer Ní Choimín. This work in progress site is styled in the manner of retro operating systems. Link to the projects Github.
